English

Hindi

Experience

🚫 No traditional work experience yet, but plenty of personal project expertise! I haven't clocked in at a 9-to-5 job, but I've been hard at work on personal projects. From chatbots to payment websites and Netflix clones, I've been building and learning. I'm all about growth and web improvement, and my personal projects prove it. While I may not have traditional work experience, I have the drive and hands-on skills to create user-friendly web solutions.

Projects

📊 **Tailwind+React Dashboard** - Created a data dashboard with ReactJS and a sleek design with Tailwind CSS.

🎧 **Netflix Clone** - Replicated the Netflix user interface with ReactJS, providing an interactive streaming experience.

🤖 **ChatGPT Clone** - Developed a clone of ChatGPT using ReactJS and real-time features with OpenAI APIs.

💰 **HooBank** (Payments Website UI) - Designed a payment website's frontend using ReactJS for a seamless user experience.

🍽️ **Gericht Restaurants** (Restaurant Website UI) - Crafted a restaurant website's frontend with a modern design and user-friendly features.
